## **ArrowSpan Unveils its Indoor High-Power Wi-Fi Mesh Network Solution MeshAP 1180**

**Santa Clara, Calif., February 21, 2007** – ArrowSpan Inc., a global provider of Wi-Fi mesh solutions, today unveiled its latest Wi-Fi mesh product, the MeshAP 1180. The newest addition to ArrowSpan's list of Wi-Fi mesh equipment provides greater signal strength to indoor deployments, using 200mW (23dBm) and transmits power with peak power of up to 1W.

"The MeshAP 1180 is a long range, high-power access point which will enable our customers to cover a larger area with fewer MeshAPs at a lower cost, and provide them with the best signal possible," said Max Lu, President/CEO of ArrowSpan.

At 23dBm, the MeshAP 1180 is an industrial strength access point, which can provide Wi-Fi access to a broad area with fewer units. With 23dBm (200mW) the MeshAP 1180 can boost node to node distance at a transmit rate of 54Mbps downstream speed to 300m (980ft) in open space, greatly improving the download strength and throughput.

ArrowSpan's dual radio design provides better Wi-Fi coverage, and can expand internet hot spots to hot zones effortlessly by using Wi-Fi mesh technology with plug-n-play installation. The company's unique technology has incorporated the software into every single MeshAP Access Point, therefore, eliminating the need for costly controllers or servers; and with the user friendly mesh manager interface, it is now easier than ever to set up and manage a Wi-Fi network. ArrowSpan's MeshAP 1180 will be available March 2007 online at <http://www.arrowspan.com>

### **About ArrowSpan, Inc.**

ArrowSpan, Inc. develops and manufactures next-generation Wi-Fi mesh network solutions. All units are specifically designed to be seamlessly compatible with all brands of an existing network access server, application server, router and gateway. Our solutions enable carriers and service providers, to expand existing wireless networks to a wider reach. ArrowSpan's streamlined design philosophy and manufacturing expertise makes the Wi-Fi mesh network solutions one of the most cost efficient solutions on the market. ArrowSpan is committed to building reliable wireless mesh solutions, and we are backing our wireless mesh Access Points with a limited three year warranty. For more information about ArrowSpan, Inc. and our products, please visit <http://www.arrowspan.com>
