March Madness Hits the Wi-Fi Mesh Industry

Santa Clara, Calif., March 2, 2007 – ArrowSpan Inc., a global provider of Wi-Fi mesh solutions, has gone mad, but not for basketball, for Wi-Fi mesh. For the month of March, ArrowSpan is offering its Indoor MeshAP 1100 for only \$99 dollars. The MeshAP 1100 can provide hotels, airports, and even construction sites with a dependable, secure, affordable and scalable Wi-Fi mesh network. The 25mW (13dBm) full duplex access point can reach a signal strength of up to 91m (300ft) at 54Mbps speed 168m (550ft) in open space.

“Our March Mesh Madness promotion is a way for people to familiarize themselves with our product,” said Max Lu, President/CEO of ArrowSpan. “The MeshAP 1100 is ideal for carriers and service providers who are looking for cost-effective indoor solutions, especially for areas that are too difficult or too expensive to install.”

The self-configuring self-healing network supports high-bandwidth and low latency applications, and implements layer 2 mesh routing which provides excellent network performance and compatibility. ArrowSpan’s multiple wireless path design for both backhaul and user traffic, eliminates adjacent AP signal interference and provides zero performance degradation. ArrowSpan has incorporated the software into every single MeshAP Access Point, therefore, eliminating the need for costly controllers or servers. The limited time, limited quantity \$99 MeshAP 1100, is now available online throughout the month of March at <http://www.arrowspan.com>

About ArrowSpan, Inc

ArrowSpan Inc. develops and manufactures next-generation WiFi wireless mesh network solutions. They are specifically designed to be seamlessly compatible with all brands of an existing network access server, application server, router and gateway. Our solutions enable carriers and service providers, to expand existing wireless networks to a wider reach. ArrowSpan’s streamlined design philosophy and manufacturing expertise, makes the WiFi mesh network solutions one of most cost efficient solutions on the market. Our commitment at ArrowSpan is to develop a product that is the best-in-class, but also profitable and economical for the carriers and service providers.
