ArrowSpan to Attend Broadband Wireless at Interop 2007 in Las Vegas

Santa Clara, Calif., May 14, 2007 – ArrowSpan Inc., a global provider of Wi-Fi mesh solutions, is announcing that its products will be exhibited at Broadband Wireless at Interop 2007, booth #2515. Interop Las Vegas 2007 will be held May 20 – 25th at the Mandalay Bay Convention Center. On display will be ArrowSpan's metro Wi-Fi MeshAP 5100 and 3100, along with the Dual RF MeshAP multi-frequency 2180 and the indoor MeshAP 1100.

Interop is a great opportunity for ArrowSpan to present its technology and products, and display to the public the low-cost deployment abilities of each MeshAP unit. Showcased at the exhibit will be both indoor and outdoor solutions, including the metro Wi-Fi MeshAP 5100/3100 Triple RF access point. The metro MeshAP 3100 has a super fast backbone and uses 802.11g as a client connection and dual 802.11a wireless technology as a backhaul connection between mesh access points, providing a dependable, scalable and easy to use city-wide network.

"Interop is the most comprehensive event for the business technology marketplace. Adding ArrowSpan to our Exhibitor list is a great addition to the event," said Interop GM, Lenny Heymann. "ArrowSpan will bring to the show the type of cutting edge technology Interop is known for."

Attendees are invited to view how the software interface of each unit works and witness just how simple it is to manage ArrowSpan's Wi-Fi mesh network. Attendees stopping by ArrowSpan's booth will also have the chance to enter a drawing to win an iPod Nano. For a detailed look at the products ArrowSpan will be showcasing at Broadband Wireless at Interop 2007, log on to <http://www.arrowspan.com>

About ArrowSpan, Inc

ArrowSpan Inc. develops and manufactures next-generation WiFi wireless mesh network solutions. They are specifically designed to be seamlessly compatible with all brands of an existing network access server, application server, router and gateway. ArrowSpan's streamlined design philosophy and manufacturing expertise, makes the WiFi mesh network solutions one of most cost efficient solutions on the market. Our commitment at ArrowSpan is to develop a product that is the best-in-class, but also profitable and economical.
