## **ArrowSpan Introduces a Metro Wi-Fi Access Point with GPS Antenna**

**Santa Clara, Calif., June 4, 2007** – ArrowSpan Inc., a global provider of Wi-Fi mesh solutions, is adding a GPS antenna to its metro Wi-Fi access point. The Triple RF MeshAP 3100G will allow managers to detect the GPS location of each access point, therefore simplifying the maintenance task. The location information can also be applied to a location-driven ad campaign and promoted to the end-user. GPS popularity has increased in the past year with advertising companies using the information they collect from the GPS device to target ad messages to users within specific geographical areas, making location-awareness a must-have feature for service providers.

"By including the GPS Antenna, users can quickly and easily determine the location and problem of each access point and upgrade each unit accordingly," said Max Lu, President/CEO of ArrowSpan. "Another great feature of the GPS Antenna is that our customers can also use the GPS information to deliver user-specific advertising, making this Wi-Fi mesh solution ideal for all users."

The MeshAP 3100G is an access point designed for city-wide deployments using dual 802.11a wireless technology as a backhaul connection between mesh access points, and uses one 802.11g as a client connection. Designed for maximum performance, scalability, and ease of use, the MeshAP 3100G is perfect for metro Wi-Fi solutions. It consists of a weatherproof enclosure with an industrial grade temperature support -40°F to 131°F (-40°C to 55°C) that can withstand wind, rain, and extreme temperatures. The MeshAP 3100G will be available July 2007. For more information about ArrowSpan and the MeshAP 3100G log on to <http://www.arrowspan.com>

### **About ArrowSpan, Inc**

ArrowSpan Inc. develops and manufactures next-generation Wi-Fi wireless mesh network solutions. Our solutions enable users to expand existing wireless networks to a wider reach. ArrowSpan's streamlined design philosophy and manufacturing expertise, makes the Wi-Fi mesh network solutions one of most cost efficient solutions on the market. Our commitment at ArrowSpan is to develop a product that is the best-in-class, but also profitable and economical for everyone. For more information about ArrowSpan Inc. and our products, please visit <http://www.arrowspan.com>.
